SUMMARY

Investment Objective

The ZEGA Buy and Hedge ETF (the “Fund”) seeks long-term capital appreciation while mitigating overall market risk.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.95%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Acquired Fund Fees and Expenses ⁽²⁾	0.02%
Total Annual Fund Operating Expenses	0.97%

⁽¹⁾ The Fund’s investment adviser, Toroso Investments, LLC (“Toroso” or the “Adviser”), a Tidal Financial Group company, will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings made for investment purposes, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses (“AFFE”), accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and litigation expenses, and other non-routine or extraordinary expenses.

⁽²⁾ AFFE are the indirect costs of investing in other investment companies. Total Annual Fund Operating Expenses do not correlate to the expense ratio in the Fund’s Financial Highlights because the Financial Highlights include the direct operating expenses incurred by the Fund and exclude AFFE.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$99	\$309	\$536	\$1,190

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. During the most recent fiscal year ended April 30, 2023, the Fund’s portfolio turnover rate was 214% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to provide exposure to the U.S. large capitalization equity market, while mitigating overall market downside risk in the event of a major market decline. To achieve its investment objective, the Fund invests in a combination of options, as well as fixed income securities, or other income producing securities, including preferred shares, through ETFs or other investment companies or through direct investments.

In pursuing the Fund’s investment objective, ZEGA Financial, LLC (“ZEGA” or the “Sub-Adviser”), the Fund’s investment sub-adviser, seeks to achieve exposure to the performance of the U.S. large capitalization equity market, generally recognized as the S&P 500® Index (the “S&P 500”), through call index options, call options on the SPDR S&P 500 ETF Trust (“SPY”) or other ETFs that track the S&P 500, and FLEXible EXchange® Options (“FLEX Options”) (collectively, “S&P 500 options”). The Fund’s S&P 500 option positions will represent 100% notional exposure to the S&P 500.

An option gives the purchaser of the option the right to purchase (for a call option) or sell (for a put option) the underlying asset (or deliver cash equal to the value of an underlying index) at a specified price (“strike price”). In the event the underlying asset declines in value, the value of a call option will generally decrease (and may end up worthless) and the value of a put option will generally increase. In the event the underlying asset appreciates in value, the value of a call option will generally increase and the value of a put option will generally decrease (and may end up worthless). FLEX Options are customizable exchange-traded option contracts guaranteed for settlement by the Options Clearing Corporation (“OCC”).

The Sub-Adviser may “ladder” the Fund’s S&P 500 option positions. “Laddering” is an investment technique that utilizes multiple option positions over multiple expiration dates, to avoid the risk of reinvesting a large portion of assets in an unfavorable financial environment, as well as creating more opportunities to roll hedges and secure gains during extended periods of market appreciation. The Sub-Adviser will ladder the Fund’s S&P 500 option positions by investing in options with multiple expiration dates over a 12-month period using at least two intervals or “rungs.” By regularly rebuilding each ladder rung as options expire the Sub-Adviser will seek to achieve additional equity exposure as markets experience reduced prices (essentially buying on dips), or realize gains as market prices increase and as hedged positions are reestablished at higher levels.

The Fund may invest significantly in fixed income and other income producing securities through ETFs or other investment companies, or through direct investments. The Fund’s fixed income investments may include below investment grade debt securities (often referred to as “high yield” or “junk” bonds). The Fund’s fixed income investments aim to generate income as a means of offsetting expenses associated with the cost of purchasing options. The Fund may purchase put options as a means of hedging to provide downside protection on the underlying holdings in the income portion of the Fund’s portfolio.

The Fund also seeks to produce income by selling out-of-the-money call options. A call option is considered “out-of-the-money” when the strike price of the option at expiration exceeds the current price of the underlying asset. The Fund will only sell call options that are either covered by the underlying asset held in the Fund’s portfolio (also known as covered call selling) or by corresponding purchased call options held in the Fund’s portfolio (also known as a long call spread).

The Fund’s option positions are determined by the Sub-Adviser based on underlying quantitative metrics, including open interest, depth of expirations, number of strike prices, implied volatility, bid/ask spread width and cost. Open interest and bid/ask spread width are indicators of the liquidity of an option position and likelihood of efficient price execution. Implied volatility is an indicator of how expensive an option is relative to other options and relative to historical ranges. In general, as volatility rises option premiums will also rise making an option more expensive. A greater number of strike prices and expirations generally gives the Sub-Adviser more flexibility when choosing levels and length of protection. The Sub-Adviser analyzes such metrics to determine the Fund portfolio’s ability to mitigate market risk while generating returns.

The Sub-Adviser makes buy and sell decisions for the Fund based on a set of defined rules established by the Sub-Adviser’s investment committee, including proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”), which may be revised from time to time. With regard to buy and sell decisions, the Sub-Adviser’s investment committee considers option data and probabilities, along with the ability to manage the risk of a position. For fixed income investments, the investment committee assesses a position’s ability to have a viable hedge that limits risk while producing desired revenue. For S&P 500 options, the investment committee typically adds new purchased call options to the Fund’s portfolio when the market value of the S&P 500 materially declines. When new call options are purchased during market declines, the Sub-Adviser still intends to limit the Fund’s S&P 500 option positions to only approximately 8-10% of the Fund’s portfolio over a 12-month period. When the market value of the S&P 500 appreciates, the S&P 500 options generally increase in value. If the value of the Fund’s S&P 500 options materially exceed the 8-10% target, the Sub-Adviser will simultaneously sell the S&P 500 options with higher market values in the Fund’s portfolio and purchase new S&P 500 options that have a lower premium to bring the Fund’s S&P 500 options holdings in-line with the 8-10% target.

By using a combination of options and fixed income positions, the Sub-Adviser seeks to limit the loss exposure of Fund portfolio holdings. The Fund’s notional exposure to the S&P 500 with options will represent 100% of the Fund’s portfolio. This limitation may be done by using put options for protection or restricting the amount spent on long calls. The Fund aims to restrict exposure to major declines in the market value of the S&P 500 as the most a purchased call option can lose is the amount paid for the call (also known as the premium). As a result, the Sub-Adviser seeks to limit the level of exposure to loss with respect to that portion of the Fund’s portfolio holding S&P 500 options to 8-10% over any 12-month period. The portion of the Fund’s portfolio holding S&P 500 options may experience a loss of more than 8-10% in a single month or quarter; however, over the prior 12-month period the Sub-Adviser’s strategy aims to limit losses within the 8-10% target range. During periods where the market value of the S&P 500 experiences multiple years of double-digit losses, the portion of the Fund’s portfolio holding S&P 500 options may experience losses of 8-10% in consecutive 12-month periods.

The portion of the Fund’s portfolio holding fixed income investments also has risk of loss exposure. The Sub-Adviser may hedge this risk of loss exposure by purchasing put options that are directly correlated to the underlying fixed income investments held in the Fund’s portfolio. The underlying fixed income investments held in the Fund’s portfolio may experience losses, but the Sub-Adviser seeks to limit those losses to 10% through the Fund’s investments in purchased put options.

The Fund may simultaneously experience losses in both its S&P 500 option positions and fixed income investments. This may result in the Fund's total portfolio experiencing losses in excess of the 8-10% target range over a 12-month period.

There are costs associated with the Sub-Adviser's options hedging strategy and the Fund typically experiences such costs in the form of option time decay. Option time decay is a measure of the rate of decline in the value of an option contract due to the passage of time. The cost of the Fund's S&P 500 options can limit the Fund's ability to achieve returns equal to the gains experienced by the S&P 500.

The Fund is deemed to be non-diversified under the Investment Company Act of 1940, as amended (the "1940 Act"), which means that it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund—Principal Risks of Investing in the Fund."

Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which they appear.

Risks of Investing in Derivatives. The Fund invests in options, which are a form of derivative investment. Derivatives have risks, including the imperfect correlation between the value of such instruments and the underlying assets or index; the loss of principal, including the potential loss of amounts greater than the initial amount invested in the derivative instrument; and illiquidity of the derivative investments. The derivatives used by the Fund may give rise to a form of leverage. Leverage magnifies the potential for risk of loss. Certain of the Fund's transactions in derivatives could also affect the amount, timing, and character of distributions to shareholders. The Fund's transactions in derivatives may result in the Fund realizing more short-term capital gain and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions, which may adversely impact the Fund's after-tax returns.

- *Options Risk.* Writing and buying options are speculative activities and entail investment exposures that are greater than their cost would suggest, meaning that a small investment in an option could have a substantial impact on the performance of the Fund. The Fund's use of call and put options can lead to losses because of adverse movements in the price or value of the underlying stock, index, or other asset, which may be magnified by certain features of the options. These risks are heightened when the Fund's portfolio managers use options intending to enhance the Fund's return or as a substitute for a position or security. When selling a call or put option, the Fund will receive a premium; however, this premium may not be enough to offset a loss incurred by the Fund if the price of the underlying asset is above or below, respectively, the strike price by an amount equal to or greater than the premium. The value of an option may be adversely affected if the market for the option becomes less liquid or smaller, and will be affected by changes in the value or yield of the option's underlying asset, an increase in interest rates, a change in the actual or perceived volatility of the stock market or the underlying asset and the remaining time to expiration. Additionally, the value of an option does not increase or decrease at the same rate as the underlying asset(s). The Fund's use of options, due to the cost of the options, may reduce the Fund's ability to achieve returns equal to the underlying asset. This means that if the underlying asset price changes, the Fund may not benefit to the same extent or at the same rate as the underlying asset price changed. In addition, if the price of the underlying asset of an option is above the strike price of a written call option or below the strike price for a written put option, the value of the option, and consequently of the Fund, may decline significantly more than if the Fund invested directly in the underlying asset instead of using options. The Fund could experience a loss if its options do not perform as anticipated, or are not correlated with the performance of their underlying index or reference asset or if the Fund is unable to purchase or liquidate a position because of an illiquid secondary market.

Equity Market Risk. The equity securities underlying the Fund's option investments may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

FLEX Options Risk. The Fund may invest in FLEX Options issued and guaranteed for settlement by the OCC. The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. Additionally, FLEX Options may be illiquid, and in such cases, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices.

Fixed Income Securities Risk. The Fund may invest in fixed income securities directly or through ETFs or other investment companies. Fixed income securities are subject to interest rate risk (discussed further herein), credit risk (discussed further herein), call risk, prepayment and extension risk, and liquidity risk. An issuer may "call," or repay, its high yielding bonds before their maturity dates. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar

or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time.

General Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

High Yield Securities Risk. Securities rated below investment grade are often referred to as high yield securities or "junk bonds." Investments in lower rated corporate debt securities typically entail greater price volatility and principal and income risk. High yield securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. The prices of high yield securities have been found to be more sensitive to adverse economic downturns or individual corporate developments. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in high yield security prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund by investing in such securities may incur additional expenses to obtain recovery.

Other Investment Companies Risk. The Fund will incur higher and duplicative expenses when it invests in ETFs and other investment companies. By investing in another investment company, the Fund becomes a shareholder of that investment company and bears its proportionate share of the fees and expenses of the other investment company. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds as the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies. ETFs may be less liquid than other investments, and thus their share values more volatile than the values of the investments they hold. Investments in ETFs are also subject to the "ETF Risks" described above.

Credit Risk. An issuer or guarantor of debt instruments or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities may be unable or unwilling to make its timely interest and/or principal payments or to otherwise honor its obligations. Debt instruments are subject to varying degrees of credit risk, which may be reflected in their credit ratings. There is the chance that the Fund's portfolio holdings will have their credit ratings downgraded or will default (i.e., fail to make scheduled interest or principal payments), potentially reducing the Fund's income level or share price.

Cybersecurity Risk. With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers may cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

ETF Risk.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Cash Redemption Risk.* The Fund's investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund (e.g., derivative instruments and bonds that cannot be broken up beyond certain minimum sizes needed for transfer and settlement). In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may have less cash efficiency and pay out higher annual capital gain distributions to shareholders than if the in-kind redemption process was used.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as NYSE Arca, Inc. (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Interest Rate Risk. Generally, the value of fixed income securities will change inversely with changes in interest rates. As interest rates rise, the market value of fixed income securities tends to decrease. Conversely, as interest rates fall, the market value of fixed income securities tends to increase. This risk will be greater for long-term securities than for short-term securities. Changes in government intervention may have adverse effects on investments, volatility, and illiquidity in debt markets. In addition, the interest rates payable on floating rate securities are not fixed and may fluctuate based upon changes in market rates. The interest rate on a floating rate security is a variable rate which is tied to another interest rate. Floating rate securities are subject to interest rate risk and credit risk.

Limited Operating History Risk. The Fund has a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser’s success or failure to implement investment strategies for the Fund. Although the Sub-Adviser has experience managing separate accounts employing the Fund’s strategy, the Sub-Adviser may not be able to replicate the historical performance of the strategy.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Models and Data Risk. The composition of the Fund’s portfolio is heavily dependent on Models and Data. When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund’s portfolio universe that would have been excluded or included had the Models and Data been correct and complete.

Non-Diversification Risk. Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including rising inflation, uncertainty regarding central banks’ interest rate increases, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine and the impact of COVID-19. The global recovery from COVID-19 may last for an extended period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so.

Tax Risk. The Fund’s investments and investment strategies, including transactions in options contracts, may be subject to special and complex federal income tax provisions, the effect of which may be, among other things: (i) to disallow, suspend, defer or otherwise limit the allowance of certain losses or deductions; (ii) to accelerate income to the Fund; (iii) to convert long-term capital gain, which is currently subject to lower tax rates, into short-term capital gain or ordinary income, which are currently subject to higher tax rates; (iv) to convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (v) to treat dividends that would

otherwise constitute qualified dividend income as non-qualified dividend income; and (vi) to produce income that will not qualify as good income under the gross income requirements that must be met for the Fund to qualify as a regulated investment company (a “RIC”) under Subchapter M of Chapter 1, Subtitle A of the Internal Revenue Code of 1986, as amended (the “Code”). Furthermore, to the extent that any option on a futures contract held by the Fund is a “section 1256 contract” under Section 1256 of the Code, the contract will be marked to market annually, and any gain or loss will be treated as 60% long-term and 40% short-term capital gain or loss, regardless of the holding period for such contract. Section 1256 contracts may include Fund transactions involving call options on a broad-based securities index and other financial contracts.

Performance

The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance over time. The bar chart shows the annual return for the Fund. The table illustrates how the Fund’s average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance. The Fund’s past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is available on the Fund’s website at www.zegaetfs.com.

Calendar Year Ended December 31, 2022

The Fund’s calendar year-to-date return as of June 30, 2023 was 10.15%.

During the period of time shown in the bar chart, the Fund’s highest quarterly return was 0.75% for the quarter ended December 31, 2022 and the lowest quarterly return was -15.53% for the quarter ended June 30, 2022.

Average Annual Total Returns

For the Periods Ended December 31, 2022

	1 Year	Since Inception (July 6, 2021)
Return Before Taxes	-22.06%	-11.73%
Return After Taxes on Distributions	-23.15%	-12.88%
Return After Taxes on Distributions and Sale of Fund Shares	-13.05%	-9.31%
S&P 500 Total Return Index (reflects no deduction for fees, expenses, or taxes)	-18.11%	-6.52%
Bloomberg US Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	-13.01%	-9.20%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements or other tax-advantaged accounts, such as an individual retirement account (“IRA”). In certain cases, the figures representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.

Management

Investment Adviser

Toroso Investments, LLC serves as investment adviser to the Fund.

Sub-Adviser

ZEGA Financial, LLC serves as investment sub-adviser to the Fund.

Portfolio Managers

Mick Brokaw, Portfolio Manager for the Sub-Adviser, is jointly and primarily responsible for the day-to-day management of the Fund's portfolio and has been a portfolio manager of the Fund since its inception in July 2021.

Jay Pestrighelli, Portfolio Manager for the Sub-Adviser, is jointly and primarily responsible for the day-to-day management of the Fund's portfolio and has been a portfolio manager of the Fund since its inception in July 2021.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in July 2021.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the "bid-ask spread."

Recent information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at www.zegaetfs.com.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser, Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund seeks long-term capital appreciation while mitigating overall market risk.

An investment objective is fundamental if it cannot be changed without the consent of the holders of a majority of the outstanding Shares. The Fund's investment objective has not been adopted as a fundamental investment policy and therefore may be changed without the consent of the Fund's shareholders upon approval by the Board of Trustees (the "Board") of Tidal ETF Trust (the "Trust") and written notice to shareholders.

Principal Investment Strategies

The following information is in addition to, and should be read along with, the description of the Fund's principal investment strategies in the section titled "Fund Summary-Principal Investment Strategies" above.

The Fund's strategy may result in the active and frequent trading of the Fund's investments, which may result in high portfolio turnover.

Temporary Defensive Strategies

For temporary defensive purposes during adverse market, economic, political or other conditions, the Fund may invest in cash or cash equivalents or short-term instruments such as commercial paper, money market mutual funds, or short-term U.S. government securities. Taking a temporary defensive position may result in the Fund not achieving its investment objective.

Principal Risks of Investing in the Fund

There can be no assurance that the Fund will achieve its investment objective. The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the section titled "Fund Summary— Principal Investment Risks" above.

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in a Fund. Some or all of these risks may adversely affect a Fund's NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Fund.

Credit Risk. An issuer or guarantor of debt instruments or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities may be unable or unwilling to make its timely interest and/or principal payments or to otherwise honor its obligations. Debt instruments are subject to varying degrees of credit risk, which may be reflected in their credit ratings. There is the chance that the Fund's portfolio holdings will have their credit ratings downgraded or will default (i.e., fail to make scheduled interest or principal payments), potentially reducing the Fund's income level or share price. The credit risk associated with a fixed income investment could increase to the extent that the Fund's ability to benefit fully from its investment in the security depends on the performance by multiple parties of their respective contractual or other obligations. The market value of a fixed income investment is also affected by the market's perception of the creditworthiness of the issuer.

Cybersecurity Risk. With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Similar adverse consequences could result from cyber incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and service providers for shareholders) and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Fund's service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by their service providers or any other third parties whose operations may affect the Fund or its shareholders. As a result, the Fund and its shareholders could be negatively impacted.

Equity Market Risk. The equity securities underlying the Fund's option investments may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

ETF Risk.

- *APs, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i)

APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- *Cash Redemption Risk.* The Fund's investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund (e.g., derivative instruments and bonds that cannot be broken up beyond certain minimum sizes needed for transfer and settlement). In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may have less cash efficiency and pay out higher annual capital gain distributions to shareholders than if the in-kind redemption process was used.
- *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or the "bid-ask spread." The bid-ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid-ask spreads. Due to the costs of buying or selling Shares, including bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a "bid-ask" spread charged by the exchange specialist, market makers, or other participants that trade the Shares. In times of severe market disruption, the bid-ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares.
- *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Fixed Income Securities Risk. The Fund may invest in fixed income securities directly or through ETFs or other investment companies. Fixed income investments are subject to the risk of an issuer's (or other party's) failure or inability to meet its obligations under the security. Multiple parties may have obligations under a fixed income investment. An issuer or borrower may fail to pay principal and interest when due. A guarantor, insurer or credit support provider may fail to provide the agreed upon protection. A counterparty to a transaction may fail to perform its side of the bargain. An intermediary or agent interposed between the investor and other parties may fail to perform the terms of its service. Also, performance of a fixed income investment may be linked to the obligations of other persons who may fail to meet their obligations.

Fixed income securities are subject to interest rate risk (discussed herein), credit risk (discussed herein), call risk, prepayment and extension risk, and liquidity risk. An issuer may "call," or repay, its high yielding bonds before their maturity dates. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater

potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time.

FLEX Options Risk. The FLEX Options held by the Fund will be exercisable at the strike price only on their expiration date. Prior to the expiration date, the value of the FLEX Options will be determined based upon market quotations or using other recognized pricing methods. The value of the FLEX Options prior to the expiration date may vary because of related factors other than the value of the reference asset. Factors that may influence the value of the FLEX Options, other than gains or losses in the reference asset, may include interest rate changes, changing supply and demand, decreased liquidity of the FLEX Options and changing volatility levels of the reference asset.

FLEX Options are listed on an exchange; however, it is not guaranteed that a liquid secondary trading market will exist. In the event that trading in the FLEX Options is limited or absent, the value of the FLEX Options may decrease.

General Market Risk. Market risk may affect a single issuer, industry, or sector of the economy or the market as a whole. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. The market value of a security in the Fund's portfolio may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price the Fund originally paid for it, or less than it was worth at an earlier time. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market or other asset classes, due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

High Yield Securities Risk. Securities rated below investment grade are often referred to as high yield securities or "junk bonds." Investments in lower rated corporate debt securities typically entail greater price volatility and principal and income risk. High yield securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. The prices of high yield securities have been found to be more sensitive to adverse economic downturns or individual corporate developments. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in high yield security prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund by investing in such securities may incur additional expenses to obtain recovery.

Interest Rate Risk. Generally, the value of fixed income securities will change inversely with changes in interest rates. As interest rates rise, the market value of fixed income securities tends to decrease. Conversely, as interest rates fall, the market value of fixed income securities tends to increase. This risk will be greater for long-term securities than for short-term securities. Changes in government intervention may have adverse effects on investments, volatility, and illiquidity in debt markets. In addition, the interest rates payable on floating rate securities are not fixed and may fluctuate based upon changes in market rates. The interest rate on a floating rate security is a variable rate which is tied to another interest rate. Floating rate securities are subject to interest rate risk and credit risk.

Limited Operating History Risk. The Fund is a recently organized management investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decisions. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser's success or failure to implement investment strategies for the Fund. Although the Sub-Adviser has experience managing separate accounts employing the Fund's strategy, the Sub-Adviser may not be able to replicate the historical performance of the strategy.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Models and Data Risk. The composition of the Fund's portfolio is heavily dependent on Models and Data. When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund's portfolio universe that would have been excluded or included had the Models and Data been correct and complete.

Non-Diversification Risk. Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a

single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund's volatility and have a greater impact on the Fund's performance.

Other Investment Companies Risk. The Fund will incur higher and duplicative expenses when it invests in ETFs and other investment companies. By investing in another investment company, the Fund becomes a shareholder of that investment company and bears its proportionate share of the fees and expenses of the other investment company. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds as the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies. The Fund may be subject to statutory limits with respect to the amount it can invest in other ETFs, which may adversely affect the Fund's ability to achieve its investment objective. ETFs may be less liquid than other investments, and thus their share values more volatile than the values of the investments they hold. Investments in ETFs are also subject to the "ETF Risks" described herein.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including rising inflation, uncertainty regarding central banks' interest rate increases, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine and the impact of COVID-19. The global recovery from COVID-19 may last for an extended period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions. As a result, the risk environment remains elevated. The Adviser and Sub-Adviser will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that they will be successful in doing so.

Risks of Investing in Derivatives. The Fund invests in options, which are a form of derivative investment. Derivatives have risks, including the imperfect correlation between the value of such instruments and the underlying assets or index; the loss of principal, including the potential loss of amounts greater than the initial amount invested in the derivative instrument; and illiquidity of the derivative investments. The derivatives used by the Fund may give rise to a form of leverage. Leverage magnifies the potential for risk of loss. Certain of the Fund's transactions in derivatives could also affect the amount, timing, and character of distributions to shareholders. The Fund's transactions in derivatives may result in the Fund realizing more short-term capital gain and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions, which may adversely impact the Fund's after-tax returns.

- *Options Risk. Writing and buying options are speculative activities and entail investment exposures that are greater than their cost would suggest, meaning that a small investment in an option could have a substantial impact on the performance of the Fund. The Fund's use of call and put options can lead to losses because of adverse movements in the price or value of the underlying stock, index, or other asset, which may be magnified by certain features of the options. These risks are heightened when the Fund's portfolio managers use options intending to enhance the Fund's return or as a substitute for a position or security. When selling a call or put option, the Fund will receive a premium; however, this premium may not be enough to offset a loss incurred by the Fund if the price of the underlying asset is above or below, respectively, the strike price by an amount equal to or greater than the premium. The value of an option may be adversely affected if the market for the option becomes less liquid or smaller, and will be affected by changes in the value or yield of the option's underlying asset, an increase in interest rates, a change in the actual or perceived volatility of the stock market or the underlying asset and the remaining time to expiration. Additionally, the value of an option does not increase or decrease at the same rate as the underlying asset(s). The Fund's use of options, due to the cost of the options, may reduce the Fund's ability to achieve returns equal to the underlying asset. This means that if the underlying asset price changes, the Fund may not benefit to the same extent or at the same rate as the underlying asset price changed. In addition, if the price of the underlying asset of an option is above the strike price of a written call option or below the strike price for a written put option, the value of the option, and consequently of the Fund, may decline significantly more than if the Fund invested directly in the underlying asset instead of using options. The Fund could experience a loss if its options do not perform as anticipated, or are not correlated with the performance of their underlying index or reference asset or if the Fund is unable to purchase or liquidate a position because of an illiquid secondary market.*

Tax Risk. The Fund's investments and investment strategies, including transactions in options contracts, may be subject to special and complex federal income tax provisions, the effect of which may be, among other things: (i) to disallow, suspend, defer or otherwise limit the allowance of certain losses or deductions; (ii) to accelerate income to the Fund; (iii) to convert long-term capital gain, which is currently subject to lower tax rates, into short-term capital gain or ordinary income, which are currently subject to higher tax rates; (iv) to convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (v) to treat dividends that would otherwise constitute qualified dividend income as nonqualified dividend income; and (vi) to produce income that will not qualify as good income under the gross income requirements that must be met for the Fund to qualify as a RIC under Subchapter M of Chapter 1,

Subtitle A of the Code. Furthermore, to the extent that any option on a futures contract held by the Fund is a “section 1256 contract” under Section 1256 of the Code, the contract will be marked to market annually, and any gain or loss will be treated as 60% long-term and 40% short-term capital gain or loss, regardless of the holding period for such contract. Section 1256 contracts may include Fund transactions involving call options on a broad-based securities index and other financial contracts.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund’s daily portfolio holdings is available on the Fund’s website at www.zegaetfs.com. A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s SAI.

MANAGEMENT

Investment Adviser

Toroso Investments, LLC, a Tidal Financial Group company, located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Toroso was founded in and has been managing investment companies since March 2012 and is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of July 31, 2023, Toroso had assets under management of \$7.1 billion and served as the investment adviser or sub-adviser for 110 registered funds.

Toroso serves as investment adviser to the Fund and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the “Advisory Agreement”). The Adviser provides oversight of the Sub-Adviser and review of the Sub-Adviser’s performance. The Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate. For the services it provides to the Fund, the Fund pays the Adviser a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.95% of the Fund’s average daily net assets.

Under the Advisory Agreement, in exchange for a single unitary management fee from the Fund, the Adviser has agreed to pay all expenses incurred by the Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (collectively, the “Excluded Expenses”) and the unitary management fee payable to the Adviser.

Investment Sub-Adviser

ZEGA Financial, LLC, a Nebraska limited liability company, located at 3801 PGA Boulevard, Suite 600, Palm Beach Gardens, Florida 33410, serves as investment sub-adviser to the Fund pursuant to a sub-advisory agreement between the Adviser and the Sub-Adviser (the “Sub-Advisory Agreement”). ZEGA is an independent investment advisor founded in 2011 offering discretionary and non-discretionary portfolio management services to separately managed accounts. ZEGA is responsible for the day-to-day management of the Fund’s portfolio, including determining the securities purchased and sold by the Fund, subject to the supervision of the Adviser and the Board. As of July 31, 2023, ZEGA had assets under management of approximately \$1.05 million.

For its services, ZEGA is paid a fee by the Adviser, which fee is calculated daily and paid monthly, at an annual rate of 0.02% of the Fund’s average daily net assets. ZEGA has agreed to assume the Adviser’s obligation to pay all expenses incurred by the Fund, except for the sub-advisory fee payable to ZEGA and Excluded Expenses. For assuming the payment obligations for the Fund, the Adviser has agreed to pay the Sub-Adviser the profits, if any, generated by the Fund’s unitary management fee. Expenses incurred by the Fund and paid by ZEGA include fees charged by Tidal ETF Services, LLC, a Tidal Financial Group company, the Fund’s administrator and an affiliate of the Adviser. See the section of the SAI titled “Administrator” for additional information about the Fund’s administrator.

A discussion regarding the basis for the Board’s approval of the Advisory Agreement and Sub-Advisory Agreement is available in the Fund’s annual report to shareholders dated April 30, 2023.

Portfolio Managers

The following individuals (each, a “Portfolio Manager”) have served as portfolio managers of the Fund since its inception in 2021. Mr. Brokaw and Mr. Pestrighelli are jointly and primarily responsible for the day-to-day management of the Fund and Mr. Ragauss oversees trading and execution for the Fund.

Mick Brokaw, Portfolio Manager for the Sub-Adviser

Mr. Brokaw joined the Sub-Adviser in 2015 and serves as the Chief Compliance Officer and Managing Director for the Sub-Adviser. Mr. Brokaw has over 25 years of experience in the financial markets, with the majority of his experience related to trading and trading platforms. Mr. Brokaw has a Bachelor of Finance from the University of Nebraska, Lincoln.

Jay Pestrighelli, Portfolio Manager for the Sub-Adviser

Mr. Pestrighelli co-founded the Sub-Adviser in 2011 and is Chief Executive Officer. Mr. Pestrighelli has over 20 years of experience in the financial markets. Mr. Pestrighelli has led the development and execution of the firm's investment strategies since its inception in 2011. He is also the author of the best-selling book "Buy & Hedge: The Five Iron Rules for Investing Over the Long Term." Prior to founding the Sub-Adviser in 2011, Mr. Pestrighelli spent 12 years managing and growing the online trading business for TD Ameritrade from 1999 to 2010. Mr. Pestrighelli has a bachelor's degree in Behavioral Science from Concordia College.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser

Mr. Ragauss serves as Portfolio Manager of the Adviser, having joined the Adviser in September 2020. Mr. Ragauss previously served as Chief Operating Officer and in other roles at CSat Investment Advisory, L.P. from April 2016 to September 2020. Previously, Mr. Ragauss was Assistant Vice President at Huntington National Bank ("Huntington"), where he was Product Manager for the Huntington Funds and Huntington Strategy Shares ETFs, a combined fund complex of almost \$4 billion in assets under management. At Huntington, he led ETF development bringing to market some of the first actively managed ETFs. Mr. Ragauss joined Huntington in 2010. Mr. Ragauss attended Grand Valley State University where he received his Bachelor of Business Administration in Finance and International Business, as well as a minor in French. He is a member of both the National and West Michigan CFA societies and holds the CFA designation.

CFA[®] is a registered trademark owned by the CFA Institute.

The Fund's SAI provides additional information about each Portfolio Manager's compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager's ownership of Shares.

Similarly Managed Account Performance

The table below provides the performance of the ZEGA Buy and Hedge Retirement Composite (the "Composite"). The accounts in the Composite are managed by the Sub-Adviser on a fully discretionary basis with substantially similar objectives, policies and investment strategies employed by the Sub-Adviser to manage the Fund. The accounts comprising the Composite are managed by the same portfolio managers of the Sub-Adviser who serve as portfolio managers of the Fund and are responsible for the day-to-day management of the Fund's portfolio.

Composite performance does not represent the historical performance of the Fund and should not be interpreted as indicative of the Fund's future performance.

The Composite returns were prepared by the Sub-Adviser in compliance with the Global Investment Performance Standards ("GIPS"). The Composite returns are unaudited and are presented net of fees and include the reinvestment of all dividends and interest income. Net returns are reduced by all fees and transaction costs incurred and are calculated using actual management fees paid by the accounts, which vary by account, and without provision for federal or state taxes.

The Fund's performance is calculated using the standard formula set forth in rules promulgated by the SEC, which differs in certain respects from the methods used to compute the performance for the Composite. The private accounts comprising the Composite are not subject to the same types of expenses incurred by the Fund nor certain investment limitations, diversification requirements and other restrictions imposed on the Fund by the 1940 Act and the Code. The performance results of the Composite would have been higher if the accounts included in the Composite had been subject to the Fund's expenses.

The following chart shows the net annual total returns for the Composite for the period from March 1, 2013 (inception) through December 31, 2013 and the calendar years 2014-2022 and is not the performance results of the Fund.

Annual Total Returns

	Composite (Net)	S&P 500 Index ¹	Bloomberg U.S. Aggregate Bond Index ²
2022	-23.77%	-18.10%	-12.94%
2021	19.04%	28.07%	-1.55%
2020	22.29%	18.40%	7.50%
2019	17.00%	31.50%	8.73%
2018	-4.50%	-4.39%	0.02%
2017	16.60%	21.83%	3.54%
2016	5.32%	11.96%	2.65%
2015	-1.66%	1.38%	0.55%
2014	7.19%	13.69%	5.97%
2013*	18.48%	32.39%	-1.83%

* Composite and benchmark performance are for the period March 1, 2013 through December 31, 2013.

1. The Composite's primary benchmark is the S&P 500® Index. The S&P 500® Index is a collection of 500 of the largest publicly traded U.S. equity large cap companies. Index returns reflect no deduction for fees, expenses or taxes.
2. The Composite's secondary benchmark is the Bloomberg U.S. Aggregate Bond Index. The Bloomberg U.S. Aggregate Bond Index is a market cap weighted index of fixed income securities and is widely considered the most used index in the fixed income investment community. Index returns reflect no deduction for fees, expenses or taxes.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or "street name" through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the Fund's NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to

cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Trust and the Adviser (as described below).

Fair Value Pricing

Consistent with Rule 2a-5 under the 1940 Act, the Trust and the Adviser have adopted procedures and methodologies wherein the Adviser, serving as the Fund's Valuation Designee (as defined in Rule 2a-5), determines the fair value of Fund investments whose market prices are not readily available or are deemed to be unreliable. For example, such circumstances may arise when: (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment's primary pricing source is unable or unwilling to provide a price; (iii) an investment's primary trading market is closed during regular market hours; or (iv) an investment's value is materially affected by events occurring after the close of the investment's primary trading market. Generally, when fair valuing an investment, the Valuation Designee will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the Adviser's fair value methodologies, subject to oversight by the Board. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

Investments by Other Registered Investment Companies in the Fund

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth by rule under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends and interest income, if any, annually, and distribute any net realized capital gains to its shareholders at least annually.

The Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a RIC under the Code. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However,

the Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable to shareholders as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable to you even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act ("FATCA"), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain "foreign financial institutions" unless such foreign financial institution agrees to verify, monitor, and report to the Internal Revenue Service ("IRS") the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution's country of residence), and (B) certain "non-financial foreign entities" unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares.

Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund's return on its investments in foreign securities or affect a shareholder's return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Foreign Investments by the Fund

Interest and other income received by the Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax treaties or conventions between certain countries and the United States may reduce or eliminate such taxes. If, as of the close of a taxable year, more than 50% of the value of the Fund's assets consists of certain foreign stock or securities, the Fund will be eligible to elect to "pass through" to investors the amount of certain qualifying foreign income and similar taxes paid by the Fund during that taxable year. This means that investors would be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax. If the Fund does not so elect, the Fund will be entitled to claim a deduction for certain foreign taxes incurred by the Fund. The Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION

Forside Fund Services, LLC (the "Distributor"), the Fund's distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no

role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund's website at www.zegaetfs.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

Delaware law permits the governing documents of a statutory trust to expand, restrict or eliminate the fiduciary duties that trustees, shareholders or other persons might otherwise be subject to, and replace them with the standards set forth in the Trust's governing documents.

The Trust's Declaration of Trust provides that the Trustees shall not be subject to fiduciary duties except as set forth in the Declaration of Trust. The foregoing relates specifically to Delaware laws. Nothing in the Declaration of Trust modifying, restricting or eliminating the duties or liabilities of trustees shall apply to, or in any way limit, the duties (including state law fiduciary duties of loyalty and care) or liabilities of such persons with respect to matters arising under the federal securities laws.

FINANCIAL HIGHLIGHTS

The Financial Highlights table is intended to help you understand the Fund's financial performance for the fiscal periods indicated. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

ZEGA Buy and Hedge ETF

FINANCIAL HIGHLIGHTS For a capital share outstanding throughout the period

	Year Ended April 30, 2023	Period Ended April 30, 2022 (1)
Net asset value, beginning of year/period	\$ 18.35	\$ 20.00
Income (Loss) from Investment Operations:		
Net investment income (loss) (2)	0.46	0.34
Net realized and unrealized gain (loss) on investments	(1.70)	(1.71)
Total from investment operations	<u>(1.24)</u>	<u>(1.37)</u>
Less Distributions:		
From net investment income	(0.57)	(0.28)
Total distributions	<u>(0.57)</u>	<u>(0.28)</u>
Net asset value, end of year/period	\$ 16.54	\$ 18.35
Total return (4)	<u>(6.67)%</u>	<u>(7.01)%⁽³⁾</u>
Ratios / Supplemental Data:		
Net assets, end of year/period (millions)	\$ 55.4	\$ 117.0
Portfolio turnover rate ⁽⁶⁾	214%	107% ⁽³⁾
Ratio of expenses to average net assets	0.95% ⁽⁷⁾	0.95% ⁽⁵⁾
Ratio of net investment income (loss) to average net assets	2.68%	2.09% ⁽⁵⁾

(1) The Fund commenced operations on July 6, 2021. The information presented is from July 6, 2021 to April 30, 2022.

(2) Calculated using average shares outstanding method.

(3) Not annualized.

(4) The total return is based on the Fund's net asset value.

(5) Annualized.

(6) Excludes the impact of in-kind transactions.

(7) Includes interest from credit facility borrowing. Excluding interest from credit facility borrowing, the ratio is 0.95% for the year ended April 30, 2023.
